Art Unit: 1793

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 29 and 33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The terms "a platinum" and "suitable solvent" render the scope of the claims vague and indefinite. In claim 33, it is indefinite as to whether metal borides or metal borohydride is produced, since line 1 recites "metal borides" whereas the last two lines recite "metal borohydride".

Claims 28-31 and 34-40 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no "description support" in the original specification for such terms as "less than about 50 wt% of a hydrogen storage alloy", "less than about 100 wt% of alkali compounds", "less than about 10 wt% carbon black", "less than about 50 atmospheres", etc.

The specification is objected to under 37 CFR 1.74 in failing to include a brief description of drawings. See MPEP 608.01(f).

Claims 27 and 32 are allowed.

Art Unit: 1793

The following is a statement of reasons for the indication of allowable subject matter: The various prior art references of record disclose a plethora of methods for forming metal borohydrides. However the prior art does not teach, disclose or suggest a method of forming metal borohydrides which includes the steps of synthesizing a carrier powder for proton H, bonding hydrogen to the carrier powder, and producing a metal borohydride powder from the carrier powder. Nor would there be any motivation from the prior art to form a metal borohydride by a process including such steps.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
